

SERVICE POSITION for WATER TREATMENT COMPANY

A Vancouver-based leader in commercial, industrial and small municipal water treatment equipment systems is pursuing an individual looking for a future in this growing industry. This position is hands-on and takes place in a variety of environments in front of the customer. Some travel required. British Columbia is our prime marketplace, with a focus on the Lower Mainland.

The successful candidate will:

- Service and repair equipment in the field
- Handle shop work as required.
- Prepare new equipment for installation or shipment.
- Install smaller systems where trades not involved.
- Do onsite start-up and monitoring of systems.
- Ship and Receive goods as required.
- Build and maintain good relationships with our customers and staff.
- Demonstrate a mechanical aptitude and ability to problem solve.
- Be a self-starter and a team player
- Show a keen interest in water treatment and desire to learn about the business.
- Have a good driving record, minimum grade 12 education and solid employment record.
- Mechanical, electrical or plumbing background, training or certification an asset.

Remuneration will depend on experience, education and demonstrated capability. An incentive program is also included. This is a formative position in a growing and fascinating field. Your drive and ability will define your role and remuneration. We will provide on the job training, and external training as needed. Please provide your resume, references and a cover letter outlining why you think you are ideally suited to this position.
